M.Sc. Zoology – Semester System

**Revised syllabus
(for 2015 admissions onwards)**

January 2015

Preamble

The Department of Zoology of Mar Ivanios College has decided to revise the syllabus of all P. G. Programmes with effect from the academic year 2015-16 as part of its continued efforts to provide the latest information to the students. Accordingly, the Board of studies in Zoology and other Faculty members held several meetings during the months of November, December 2014 and January 2015. After deliberations and incorporating the suggestion of external experts namely, Dr. Oommen V. Oommen, Dr. G. Sreenivas, , Dr. Sanil George, Dr. Dinesh Roy, Dr. Francis Sunny and Dr. Vijaya Kumaran Nair, the syllabus was revised. The existing syllabus was updated by the addition of relevant information contents, web resources and avoiding duplication with the existing U G Syllabus, as far as possible. The UGC-CSIR NET syllabus and syllabi of other reputed universities and colleges in India and abroad were also given due consideration. Furthermore, the decision of the University Grants Commission banning the use of animals for dissections was considered while designing the practical experiments.

Four faculty members were selected as coordinators of the four semesters in the meeting held on 20 – 10 - 2014:

Semester – I – Dr. Leenamma Joseph, Chairperson, Board of Studies

Semester – II – Dr. K.G Manju

Semester – III – Dr. P.I. Paul

Semester – IV – Dr. V.S. Josekumar

Dr V.S Josekumar was entrusted with the duty of compiling the draft syllabus. The same was circulated among the participants and feedback incorporated, as received. The draft syllabus was discussed and approved by the P. G. Board of Studies held on 25th January 2015 at Mar Ivanios College Thiruvananthapuram

The Chairman and Members of the P. G. Board of Studies would like to place on record their gratitude to the entire faculty who took part in the discussion and contributed to the design of the syllabus, which will be effective from the academic year 2015-16. Comments &, suggestions for improvement are welcome.

Dr. Leenamma Joseph
Chairman BoS in Zoology & Head,
Department of Zoology
Mar Ivanios College, Thiruvananthapuram

Thiruvananthapuram
25-01-2015

General Instructions

1. Study of local fauna is to be made compulsory and included as part of field visit, as applicable.
2. The Practical Record valuation is to be done by external examiners as the present system of Internal Valuation is making the students take it lightly.
3. Web resources, CDs, appropriate software etc should be used as far as possible.
4. The Project should be given importance. Name of the supervising teachers is to be included in the dissertation. The project should be valued by the examiners who conduct the viva voce.
5. The topics for project should be decided during the beginning to the 3rd semester and the student should present a brief review and proposed methodology towards the middle of the semester in an internal presentation in the Department, involving all students and teachers.
6. A final departmental level presentation based on LCD/OHP/Laptop should be made at the end of the 4th semester, including all students and teachers.
7. A presentation using LCD/OHP/Laptop before the external examiners during the viva voce which will be the basis of awarding marks.
8. 25 marks is allotted for viva voce and 75 for the project report as per guidelines.

Table I: Scheme of question paper – Theory Courses: ESE

Type of Questions	Question No.	No. of questions to be answered	Marks
I. Short Answer	1 - 15	10	10 x 2 = 20
II. Paragraph	16 - 25	6	6 x 4 = 24
III. Short Essay	26 - 30	3	3 x 7 = 21
IV. Long Essay	31 - 32	1	1 x 10 = 10
Total			75

Table II: Components and weightage for CE of theory course

Sl.No.	Component	Marks
1.	Attendance	5
2.	Average of Class tests	10
3.	Seminar	5
4.	2 Assignments	5
	Total	25

Table III: Components and weightage for CE of Practical course

Sl.No.	Component	Marks
1.	Attendance	5
2.	Average of Class tests	10
3.	Performance	5
4.	Record (punctuality)	5
	Total	25

Table IV: Grading of attendance

Attendance	Mark
Above 90%	5
86 to 90%	4
81 to 85 %	3
76 to 80%	2
75%	1

A student with attendance below 75% cannot appear for the ESE.

SEMESTER I
APZO 121: BIOCHEMISTRY

Total 100 hours

Module I: Introduction (6 hrs)

- 1.1 Atoms, molecules, intermolecular and intra molecular interactions;
- 1.2 **Bonds** - covalent and electrovalent bonds, ionic bond, hydrogen bond.
- 1.3 **Water**: Biological importance, Unique solvent properties, electrolytic dissociation in to cations and anions.
- 1.4 **pH and Acid base balance**: Buffers: Biological importance. Henderson-Hasselbalch equation.

Module II: Carbohydrates (12 hrs)

- 2.1. Classification and nomenclature of carbohydrates; Biological importance.
- 2.2. **Monosaccharides**: Glucose, fructose, galactose, mannose and ribose. Isomerism – Structural isomerism and stereoisomerism, optical isomerism, Epimerism and Anomerism.
- 2.3. **Reactions of monosaccharides**: Oxidation, reduction, ester formation, Osazone formation. Glycosidic bond.
- 2.4. **Disaccharides**: Sucrose, Lactose, Maltose, Isomaltose, Cellobiose and Trehalose.
- 2.5. **Polysaccharides**:
 - a) Homopolysaccharides- Starch, glycogen, cellulose, Chitin, Dextrans, Inulin, Pectin.
 - b) Heteropolysaccharides- Hyaluronic acid, Heparin, Chondroitin sulphate, Keratan sulphate, Dermatan sulphate and Agar-agar.
 - c) Glycoproteins and Mucoproteins.

Module III. Proteins (10 hrs)

- 3.1 **Aminoacids**: Structure, classification and properties of amino acids. pKa value and iso-electric pH of amino acids. Peptides and peptide synthesis; Reactions (due to carboxyl group, amino group and side chains); Colour reactions of amino acids and proteins
- 3.2 **Proteins**: Biological importance; Structure and Classification-Primary structure of protein (eg. insulin);

- 3.3 **Secondary structure:** Alpha helix, Collagen helix, Beta pleated sheet, Ramachandran angles and Ramachandran map.
- 3.4 **Fibrous proteins:** examples (Keratin, Collagen, Elastin, Resilin, Fibrous muscle proteins); Chaperons.
- 3.5 **Tertiary structure:** Globular protein- eg Myoglobin.
- 3.6 **Quaternary structure:** e.g. Haemoglobin
- 3.7 **Tissue protein in health and diseases:** Collagen, structure and synthesis, abnormal collagens, elastin, keratins, muscle proteins, lens proteins and cataract

Module IV. Lipids (10 hrs)

- 4.1. **Classification of lipids:** Simple, compound and derived lipids. Biological importance of lipids.
- 4.2. **Fatty acids:** classification, nomenclature.
- 4.3. **Simple fats:** Triacylglycerol (Triglycerides) - Physical properties. Reactions - Hydrolysis, Saponification, Rancidity. Acid number, Saponification number, Iodine number oxidation, Ketosis, *Reichert-Meissl-Wollny* value
- 4.4. **Compound lipids:** Phospholipids- Lecithin, Phosphatidyl inositol, Cephalins, Plasmalogens. Glycolipids, Sphingolipids
- 4.5. **Steroids:** Biologically important steroids-cholesterol, Vitamin D, Bile acids, Ergosterol, Terpenes. Prostaglandins- Structure, types, synthesis and functions.
- 4.6. Lipoproteins.

Module V. Nucleic Acids (6 hrs)

- 5.1 **Structure of nucleic acids and nucleotides:** Structural organization of DNA (Watson –Crick model), Types of DNA - A, B, C, Z, triplex and tetraplex DNAs. Types of RNA.
- 5.2. Electrostatic interaction, hydrogen bonding stacking interactions.
- 5.3. Biological roles of nucleotides and nucleic acids (self study).

Module VI. Enzymes (10 hrs)

- 6.1. Classification (I.U.B. system) co-enzymes, iso-enzymes, ribozyme (self study).
- 6.2. Enzyme specificity.
- 6.3. **Mechanism of action of enzymes.** Formation of enzyme substrate complex. Various theories.

- 6.4. **Enzyme kinetics:** Michaelis-Menten equation. K_m value and its significance . Enzyme velocity and factors influencing enzyme velocity. Enzyme inhibition- suicide inhibition and feedback inhibition, kinetics of allosteric enzymes.
- 6.5. **Enzyme regulation:** Types of regulation, Allosteric regulations, Covalent modification.

Module VII. Carbohydrate Metabolism (8 hrs)

- 7.1. **Major metabolic pathways:** Glycolysis – Fate of pyruvate. Citric acid cycle and its significance; Oxidative & substrate level phosphorylation. Pentose phosphate pathway (self study).
- 7.2. Gluconeogenesis, Cori cycle
- 7.3. **Glycogen metabolism:** Glycogenesis, Glycogenolysis, adenylate cascade system Ca^{+2} Calmodulin-sensitive phosphorylase kinase. Regulation of glycogen synthesis
- 7.4. Inborn errors associated with carbohydrate metabolism. Glycogen storage diseases, Lactose intolerance, Galactosuria
- 7.5. Factors maintaining blood glucose, Normal plasma glucose level, OGTT (oral glucose tolerance) test

Module VIII. Metabolism of Proteins, Amino acids and nucleic acids (10 hrs)

- 8.1. **Amino acid metabolism:** Deamination, Transamination and Trans-deamination, decarboxylation; catabolism of glucogenic and ketogenic aminoacids with examples.
- 8.2. Formation and disposal of ammonia- Urea cycle.
- 8.3. Synthesis of biologically significant compounds from different aminoacids with special reference to glycine, glutamic acid, phenylalanine, tyrosine and tryptophan.
- 8.4. **Heme metabolism:** Structure, biosynthesis and break down, bilirubin metabolism, plasma bilirubin, jaundice.
- 8.5. Catabolism of purines and pyrimidines.

Module IX. Metabolism of Lipids (8hrs)

- 9.1. **Fatty acid metabolism:** Beta oxidation, alpha oxidation and omega oxidation of fatty acids; *Bio* synthesis of fatty acids.
- 9.2. Formation of ketone bodies, ketosis and keto acidosis.
- 9.3. **Cholesterol:** Biosynthesis and regulation.
- 9.4. Role of liver in lipid metabolism

Module X. Energy metabolism (8 hrs)

- 10.1. Energy rich compounds and their biological significance
- 10.2. **Biological oxidation**- Mitochondrial electron transport, oxidative phosphorylation, ATP synthesis, Chemi-osmotic theory

Module XI. Detoxification (3 hrs)

- 11.1. Formation of toxic compounds in the body
- 11.2. **Detoxification** - oxidation, reduction, hydrolysis and conjugation

Module XII. Free radicals and anti oxidants (3 hrs)

- 12.1. Free radicals and antioxidants, Generation of free radicals. Reactive oxygen species. Damage produced by free radicals, Free radical scavenger systems.
- 12.2. Lipid peroxidation. Preventive antioxidants.
- 12.3 Oxidative stress

Module XIII. Biochemistry of aging (3 hrs)

- 13.1. Cellular aging
- 13.2. Diseases associated with aging – e.g. Alzheimer's.
- 13.3 Apoptosis

Module XIV. Clinical biochemistry (3 hrs)

- 14.1. Introduction to clinical biochemistry,
- 14.2 Analysis of body fluids (blood, urine, CSF)

APZO 122
GENETICS, QUANTITATIVE ANALYSIS AND RESEARCH
METHODOLOGY
(Total 100 Hrs)

GENETICS (70hrs)

Module 1: Introduction

- 1.1 Review of Mendelian genetics, extensions of Mendelian genetics (self study)

Module II: Mendelian Genetics and its Application (15 hrs)

- 2.1 Linkage and crossing over (self study),
2.2 **Gene mapping methods:** linkage maps, tetrad analysis, mapping with molecular markers, mapping by somatic cell hybrids, QTL mapping, Lod score for linkage testing.
2.3 Recombination frequency
2.4 Expressivity, penetrance, phenocopy, genomic imprinting

Module III: Population Genetics (15 hrs)

- 3.1 Genetic variations
3.2 Polymorphism
3.3 Gene pool
3.4 Gene frequency
3.5 Distribution patterns
3.6 Hardy Weinberg equilibrium
3.7 Disequilibrium
3.8 Factors disrupting gene equilibrium

Module IV: Human Genetics (10 hrs)

- 4.1 **Pedigree analysis** – Karyotype analysis, Chromosome banding
4.2 X-Chromosome dosage compensation, Lyon hypothesis and mosaicism
4.3 Genetics of ABO system (self study), Rh disease and its inheritance, HLA typing
4.4 Sickle haemoglobin and inheritance; thalasseмииs
4.5 **Genetic disorders** –Klinefelter’s, Turner, Down, Patau, Edwards, Cri-du-chat syndromes, Philadelphia chromosome (self study).

Single gene, chromosomal, multifactorial inherited, acquired somatic

4.6 Personalised medicine

4.6 Genetics of cancer: Genetics and toxicology; mutagenicity, clastogenicity and teratogenicity

Module V: Microbial Genetics (15 hrs)

5.1 Retrovirus

5.2 Viral genome and multiplication – HIV genome and multiplication

5.3 Reproductive cycle of RNA viruses

5.4 Plasmids – Vector DNA – Insert DNA

5.5 Lambda Phages

5.6 Microbes in genetic engineering

Module VI: Applied Genetics (10 hrs)

6.1 Human Genome Project (self study)

6.2 Genetics and modern agriculture

6.3 Genetics in animal breeding

6.4 Genetics and medicine

6.5 Legal and ethical issues in genetics

6.6 Human gene therapy

6.7 DNA fingerprinting:

6.7.1 Applications in forensic science (DNA typing)

6.7.2 Applications in paternity testing (DNA excision)

6.7.3 History and development of concept of ethics and ethical committee (seminar or invited talk)

QUANTITATIVE ANALYSIS & RESEARCH METHODOLOGY (30 hrs)

QUANTITATIVE ANALYSIS (15 hrs)

Module VII: Introduction (2 hrs)

7.1 Definition, history, scope of biostatistics and applications of statistics in biology (self study)

7.2. Descriptive and inferential statistics

7.3. Preliminary concepts - population and sample, statistic and parameter, variables, sampling (self study)

- 7.4. Collection of data- primary and secondary data, methods; use of software in statistics.

Module VIII: Descriptive Statistics (2 hrs)

- 8.1 Processing and classification of data, presentation of data-tabulation and graphical and diagrammatic representation (self study)
- 8.2. Measures of Central Tendency, problems (self study).
- 8.3. Measures of Dispersion-problems, Skewness and Kurtosis
- 8.4. Correlation and Regression, problems (self study),

Module IX: Probability distribution (3 hrs)

- 9.1. Definition, important terms and concepts
- 9.2. Theorems in probability
- 9.3. Important theoretical distributions- Binomial, Poisson, and Normal probability distributions.

Module X: Parametric test (4 hrs)

- 10.1. Basic idea - hypothesis testing, types of errors
- 10.2. Tests of significance for large and small samples- Z-test, Chi- Square Test, Student's 't' test, F-test - problems -and ANOVA

Module XI: Non-parametric tests (2 hrs)

- 11.1. Characteristics, advantages and disadvantages
- 11.2. Types (Brief account only)

Module XII: Vital statistics (2 hrs)

- 12.1. Introduction, uses, methods of collection
- 12.2. Measures of Vital Statistics, life tables

RESEARCH METHODOLOGY 15 hrs

Module XIII: Introduction (2 hrs)

- 13.1. Definition, meaning, objectives, and significance of research, Research methods vs. Methodology.
- 13.2. Types of research – Descriptive vs. Analytical, Applied vs. Fundamental, Quantitative vs. Qualitative and Conceptual vs. Empirical.

13.3. Characteristics of good research, steps of research

Module XIV: Research Formulation (2 hrs)

14.1. Formulation and defining a research problem, techniques involved

14.2. Literature survey-Journals, conference proceedings, books, government reports, etc,

14.3. Problem selection, formulation of working hypothesis

Module XV: Research design (2 hrs)

15.1. Meaning, need and features of a good research design

15.2. Different types of research design (exploratory, descriptive, diagnostic and hypothesis-testing research studies)

15.3. Developing a research plan.

Module XVI: Execution of research plan (2 hrs)

16.1. Data collection methods-primary and secondary, sampling design (self study), measurements etc.; LC 50 & Dose response.

16.2. Analysis of data (self study)

16.3. Interpretations –advantages and techniques-and generalizations of the findings

Module XVII: Scientific documentation (3 hrs)

17.1. Significance of report writing, types of reports

17.2. Research report writing (thesis, dissertations, research articles, etc) - characteristics and format

17.3. Writing and preparation of articles for publication and for oral and poster presentation

17.4. Project proposal and report writing.

Module XVIII: Research, extension and ethics (4 hrs)

18.1. Publications-abstracting and indexing journals, books, conference / seminar proceedings, periodicals, reference sources, reviews, monographs. Extension tools, impact factor, citation.

18.2. Online libraries, e-journals, e-books, e-encyclopaedia, institutional websites, TED Talk.

18.3. Intellectual property Rights-copy right, patents, trademarks, geographical indications, industrial design.

- 18.4. Research misconduct: fabrication, falsification and plagiarism
- 18.5. Precaution - ISO standards for safety, lab protocols,
- 18.6. Ethical norms, codes and policies for research ethic, laws in India
- 18.7. Lab animal use, institutional animal Ethical committee (IAEC), IACUC, control of bio-hazards

APZO 123
BIOPHYSICS, INSTRUMENTATION, COMPUTER SCIENCE
AND BIOINFORMATICS
(Total 100 Hrs)

BIOPHYSICS (30 Hrs)

Module 1. Thermodynamics (8 Hrs)

- 1.1. **Introduction** - Concept of energy and laws of Thermodynamics.
- 1.2. **Matter and energy**-Life as an energy system-order, disorder, Entropy, Enthalpy.
- 1.3. **Photo bioenergetics**: Photosynthesis – light and dark reactions, Redox couple and redox potential
- 1.4. **Chemo-bioenergetics**: electron transport and oxidative phosphorylation, Chemiosmotic theory and binding change mechanism of ATP synthesis.
- 1.5. Life as an autocatalytic system

Module II. Electromagnetic spectrum (8 Hrs)

- 2.1. Cosmic radiation, Gamma radiation, X Rays, UV radiation, visible spectrum, Infrared rays, microwaves and radio waves.
- 2.2. Biological effect and applications

Module III. Radiation Biophysics (10 Hrs)

- 3.1. Radioactivity, Detection and measurement of radiation
- 3.2. Radio-labelling methods,- detection and measurement of different types of radioisotopes and their applications in biology, incorporation of radioisotopes in biological tissues and cells, molecular imaging of radioactive material and safety guide lines
- 3.3.1 Ionizing radiation and induced mutations
- 3.4. Fluorescence
- 3.5. Nuclear medicine-Internally administered radioisotopes. Radioiodine in thyroid function analysis. Renal, liver and lung function analysis.

Module IV . Nanotechnology (4 hrs)

- 4.1 Introduction to Nanobiology
- 4.2 Biosensors and Nanomedicines and nano toxicology.

INSTRUMENTATION (50 hrs)

Module V. Methodology and working of microscopes (15 Hrs)

- 5.1 Principles of microscopy, Compound microscope (self study)
- 5.2 Phase contrast microscope, Inverted microscope
- 5.3. Fluorescent microscope, Mention dyes used.
- 5.4 Electron microscope- SEM and TEM, Environmental scanning electron microscope, Scanning Tunnelling Microscope (STM), Atomic Force Microscope (AFM); Fixation techniques for EM, Freeze etch and freeze fracture methods for EM,
- 5.5 Laser scan confocal microscope

Module VI. Centrifugation (4 Hrs)

- 6.1 Ordinary, high speed centrifuges
- 6.2 Density gradient centrifugation
- 6.3, Ultracentrifugation

Module VII. Electrophoresis (7 Hrs)

- 7.1 Principle
- 7.2 Electrophoresis- Native PAGE, SDS PAGE, Agarose Gel Electrophoresis, Capillary Electrophoresis, high voltage electrophoresis, Two dimensional Electrophoresis, Gel documentation, MALDI,
- 7.3 High voltage electrophoresis
- 7.4 Immuno electrophoresis- principle and application
- 7.5 ELISA, RIA, FIA

Module VIII. Chromatography (4 Hrs)

- 8.1. Principle
- 8.2. Column chromatography, Ion exchange chromatography, HPLC, Gas chromatography, TLC, HPTLC.

Module IX. Biophysical methods (20 Hrs)

- 9.1. Colorimeter, flame photometer
- 9.2 Spectrophotometer: Atomic absorption spectrophotometer, fluorescent spectrometer
- 9.3 Infra red spectrophotometry, NMR and EMR spectroscopy, Different types of Mass spectrometry and surface plasma resonance methods

- 9.4 Molecular structure determination using X ray diffraction, circular dichroism.
- 9.5. Electrophysiological methods- simple neuron recording, patch clamp recording, ECG, Brain activity recording, PET (Positron emission tomography), MRI, FMRI, CAT scanning methods

COMPUTER SCIENCE AND BIOINFORMATICS (20 Hrs)

COMPUTER SCIENCE (5 Hrs)

Module X. Introduction to computer science

Topics for self study

- 10.1. Basic organisation of a computer, Characteristics of computers, computer generations.
- 10.2. Hardware and software: Hardware-input/output devices, processor, storage devices.
- 10.3. Software: System software & application software. Concept of free software
- 10.4 Operating systems: Windows, DOS, Linux
- 10.5 Computer Programming languages: Low level languages, High level languages
- 10.6 Artificial intelligence (1 hr)

Module XI. Computer and Communications (4 Hrs)

- 11.1 LAN (local area net work), WAN(wide area network, MAN (Metropolitan area network); Internet and email.
- 11.2 Cyber security
- 11.3 Software piracy

BIOINFORMATICS (15 Hrs)

Module XII. Introduction (1 Hrs)

- 12.1 Introduction to bioinformatics, brief history, goal, scope, applications and limitations of Bioinformatics.

Module XIII. Data bases (4 Hrs)

- 13.1 Data bases: Biological databases - primary, secondary and specialized data bases; pitfalls of biological data bases.
- 13.2 Information retrieval from biological data bases - Entrez, GenBank, FASTA, BLAST

Module XIV. Sequence Alignment (4 Hrs)

- 14.1 Sequence alignment - Pairwise sequence alignment, evolutionary basis of sequence alignment, methods of sequence alignment, dot matrix method, dynamic programming method, scoring matrices - PAM and BLOSUM; Multiple sequence alignment.

Module XV. Phylogenetic trees (4 Hrs)

- 15.1 Construction of rooted and un-rooted phylogenetic trees, their interpretation and use in analyzing evolutionary trends, steps in phylogenetic analyses

Module XVI. Computational biology (2 Hrs)

- 16.1 Brief overview of computational biology, computation, prediction and modulation of biological pathways, (ex. Kegg pathways) e-cell, computational analyses of genomes and proteomes.

SEMESTER - II

APZO 221

ADVANCED PHYSIOLOGY AND FUNCTIONAL ANATOMY (100 Hrs)

Module 1- Introduction (self study)

- 1.1 A brief history of Physiology and Anatomy
- 1.2 Cell as a living Module of the body
- 1.3 Fluids in the cell environment – intracellular and extra cellular fluids

Module II – Support and Movement (11 hrs)

- 2.1. Cytoskeleton, hydrostatic skeleton; amoeboid movement, ciliary/flagellar movement.
- 2.2. **Musculo-skeletal system:** general considerations; gross and microscopic structure of bone, cartilage and skeletal muscle; role of skeleton in locomotion with reference to humans.
- 2.3. Theories and molecular basis of muscle contraction.
- 2.4. Neural control of muscle tone and posture; Catch muscle and Fibrillar muscle.
- 2.5. **Clinical implications:** Muscular dystrophy, Muscle strain, Muscle cramps, Tennis elbow, Hamstring injuries, sprains (brief account only).

Module III- Nutrition (9hrs)

- 3.1. Feeding mechanism in animals, Human digestive system-functional anatomy (self study)
- 3.2. Gastro-intestinal enzymes and hormones.
- 3.3. Neural Control of Gastrointestinal Function
- 3.4. Mechanism of Absorption of digested nutrients
- 3.5. **Obesity:** causes and consequences
- 3.6. **Gastro -intestinal disorders:** IBS, Constipation, Peptic ulcer, Diarrhoea, bloating, gastritis, etc., (brief account only).

Module IV- Circulation (14hrs)

- 4.1 Types of heart, anatomy of human heart (self study) and Haemopoiesis.
- 4.2 Body fluids in invertebrates and vertebrates.
- 4.3. Systemic, pulmonary, Coronary and portal circulations.

- 4.4 Conducting system of heart and cardiac cycle; Heart sounds
- 4.5 How heart has been identified as a master organ of circulation (Seminar)
- 4.5. **Cardiovascular disorders:** Coronary heart disease – Atherosclerosis, Angina and myocardial infarction or heart attack, Heart failure, Hypertrophic cardiomyopathy, Stroke and Circulatory Shock.
4. 5. Control of blood pressure and blood flow

Module V- Respiration (10 hrs)

- 5.1. Respiratory organs in invertebrates and vertebrates, with special emphasis on anatomy and function.
- 5.2. Mechanism of Pulmonary ventilation.
- 5.3. Respiration in unusual environments – Aviation, High altitude, Deep sea diving, Foetal respiration.
- 5.4 Neural and chemical regulation of respiration
- 5.5 **Respiratory disturbance:** Pulmonary Emphysema, Hypercapnia, Atelectasis, pneumonia, tuberculosis, asthma (brief account only).
- 5.6. Oxygen therapy, Artificial respiration.

Module VI - Excretion (10 hrs)

6. 1. Types of Excretion, Structure of kidney, Basic renal process (self study)
- 6.2 Comparative account of excretion in different animal groups.
- 6.3. Regulation of sodium and water balance: Primary sodium re-absorption, Urine concentration.
- 6.4. Diuretics and kidney diseases; Creatine clearance - Plasma creatine.
- 6.5. Haemodialysis, Peritoneal dialysis and kidney transplantation.
6. 6. Renal and respiratory regulation of acid-base balance, regulation of blood volume and extra cellular fluid volume.

Module VII - Nervous Co-ordination (11 hrs)

- 7.1. Neurons, types of neurons, gross neuro-anatomy of the brain and spinal cord, central and peripheral system, and Giant nerve fibres in invertebrates (self Study)
- 7.2. Transmission of nerve impulse, Action potentials, Ion channels
- 7.3. Physiology of synaptic transmission, neuro transmitters, neuro modulators, alpha and beta blockers and mechanism of neuro transmitter release.

7.4. **Neuronal disorders**- excitotoxicity and NMDA receptors, Parkinson's disease, Alzheimer's disease, Huntington's disease; Factors leading to neuronal death

7.5. Stress and central nervous system.

Module VIII - Endocrinology (11 hrs)

8.1. Invertebrate and Vertebrate endocrine system (self study)

8.2. Classification of Hormones and nature of hormonal action

8.3. Structure and function of different hormones

8.4. Neuro-endocrine feedback and response to various stimuli

8.5. Stress and endocrine system.

Module IX - Somatic and Special senses (10 hrs)

9.1 Structure of Invertebrate (compound eye, eye of octopus) and Vertebrate eye

9.2 Position, Tactile, Pain, Thermal and Taste Senses

9.3 Visual pathways - organisation of visual cortex; Analysis of visual information, detection of colour.

9.4 Auditory pathways - Functions of cerebral cortex in hearing.

9.5 Neuronal mechanism of sound detection and direction.

Module X - Human Reproduction (8 hrs)

10.1 **Male reproductive system**- Anatomy, Spermatogenesis and transport of sperm (self study)

10.2 Hormonal control of male reproductive function

10.3 **Female reproductive system**- Anatomy, Ovarian function (self study)

10.4 Control of ovarian function. Menstrual cycle: Ovarian and uterine changes; hormonal regulation. Androgen in women.

10.5 **Pregnancy**: Events of early pregnancy - Sperm activation, Fertilization, implantation, HCG secretion and maintenance of corpus luteum; Placentation; Hormonal and other changes during pregnancy- Parturition, Lactation.

10.7 Birth control measures; Pre-natal diagnostic tests.

10.8 Adjustments of the infants to extra uterine life.

Module XI- Sports Physiology (6 hrs)

11.1 **Muscles in exercise**: Strength, Power, and Endurance of Muscles, Muscle Hypertrophy.

- 11.2 **Muscle metabolic systems in exercise:** (1) the phosphocreatine-creatine system, (2) the glycogen-lactic acid system, and (3) the aerobic system
- 11.3 Cardiovascular System in Exercise
- 11.4 Drugs and athletes; Dope test.

APZO 222
SYSTEMATICS AND EVOLUTIONARY BIOLOGY
Total 100 hours

SYSTEMATICS (50 hrs)

Module I: Definition and basic concepts of Systematics and Taxonomy (5 hrs)

- 1.1. Historical resume of systematics
- 1.2. Importance and application of systematics in biology
- 1.3. Material basis of systematics

Module II: Taxonomic tools and techniques (15 hrs)

- 2.1. Taxonomic Procedures-collection, preservation, curation and process of identification.
- 2.2. Taxonomic characters of different kinds- quantitative and qualitative analysis of variation, Process of typification, different zoological types (holotype, paratype etc) and their significance.
- 2.3. Taxonomic keys- different kinds of taxonomic keys, their merits and demerits
- 2.4. Systematics Publications: Different types; Preparation of taxonomic publications
- 2.5. International code of zoological nomenclature, its operative principles. Implication and application of important rules
- 2.6. Zoological nomenclature - formation of scientific names of various taxa (Homonymy and Synonymy)

Module III: Taxonomic characters and dimensions of speciation (15 hrs)

- 3.1. Taxonomic characters- different kinds, origin of reproductive isolation, biological mechanism genetic incompatibility
- 3.2. Dimensions of speciation - types of lineage changes. Production of additional lineage.
- 3.3. Species concept- species category, different species concepts, sub species, deme and other intra specific categories, hierarchy of categories

Module IV: Trends in systematic (15 hrs)

- 4.1. Chemotaxonomy
- 4.2. Cytotaxonomy
- 4.3. Molecular Systematics
 - 4.3.1. Recent trends based on proteomics and genomics

4.3.2. DNA bar coding and Barcoding of life

4.3.3. Phylogenetic trees

EVOLUTIONARY BIOLOGY (50 HOURS)

Module V: Cosmic evolution and origin of life (3 hrs)

5.1. Cosmic evolution: origin of the universe, matter-time-space continuum. Theory of oscillating universe. Origin of galaxies, stellar systems, planets and earth.

5.2. Origin of life -Physical basis of life, extra terrestrial life.

Module VI: Molecular evolution (15 hrs)

6.1. Gene evolution

6.2. Evolution of gene families, molecular drive

6.3. Molecular divergence: Amino acid sequence divergence in proteins; Nucleotide divergence in DNA

6.4. Neutral evolution

6.5. Molecular clock

6.6. Ancient DNA

Module VII: Biochemical and genomic evolution (15 hrs)

7.1. The evolutionary history of proteins

7.2. Outline of origin of prokaryotic and eukaryotic genomes

7.3. The C Value paradox

7.4. Evolutionary history of neural integration

7.5. Evolution of endocrine systems, Hormones and evolution

Module VIII: Origin of Higher categories (10 hrs)

8.1. Origin of eukaryotic cells

8.2. Origin of metazoa, Theories of origin

8.3. Origin, evolution and extinction of Trilobites

8.4. Origin and evolution of vertebrate groups- Pisces, Amphibia, Reptilia, Aves and mammals

8.5. Phylogenetic gradualism and punctuated equilibrium (self study)

8.6. Micro, macro and convergent evolution; co evolution and parallel evolution; adaptive radiation.

Module IX: Human Evolution (7 hrs)

9.1 Self study topics:

- i) Factors in human origin-Hominid fossils.
 - ii) Evolution of culture: early migration, hunter-gatherer societies.
 - iii) Stages in Primate Evolution - Prosimii, Anthrooidea and Hominids.
- 9.2 Cytogenetic and Molecular basis of origin of man-African origin of modern man- Mitochondrial Eve, Y chromosomal Adam.
- 9.3 Evolution of human brain- communication, speech and language.

APZO223
CELL AND MOLECULAR BIOLOGY
(100 Hours)

Module I. Membrane structure, models and membrane transport (8 hrs)

- 1.1 Structure of plasma membrane, models (self study)
- 1.2 Membrane pumps and channels
- 1.3 Membrane transport:
 - 1.3.1. Passive transport (self study)
 - 1.3.2. Active transport - Uniport, Symport, Antiport, Co-transport

Module II. Cell-cell signalling (8 hrs)

- 2.1 Cell surface receptors
- 2.2 Signal transduction pathways (cyclic AMP, cyclic GMP, Ras, Raf and MAP kinase pathways)

Module III Cell cycle (8 hrs)

- 3.1 Cell cycle (self study)
- 3.2 Cyclin and cyclin – dependent kinases
- 3.3 Regulation of CDK – cyclin activity
- 3.4 Check points in the cell cycle
- 3.5 Proto onco genes, Onco genes, Tumour suppressor gene. Regulation of cell cycle in malignant cells
- 3.6 Apoptosis

Module IV. Chromatin structure (7 hrs)

- 4.1 Types of Chromatin
- 4.2 Detailed structure of nucleosome; higher order structure of chromatin and the role of histones, scaffold proteins, and radial loop model

Module V. Topology of Nucleic Acids (6 hrs)

- 5.1 Types Linking number and writhing number
- 5.2 DNA Super coiling
 - 5.2.1 Super coiling in prokaryotes
 - 5.2.2 Super coiling in eukaryotes
 - 5.2.3 Role of topoisomerases

Module VI. Organization of the eukaryotic genome (12 hrs)

- 6.1 Genomic size and genetic content
- 6.2 Complexity of eukaryotic genome:
 - 6.2.1 Intragenic sequences - exons, introns; split gene organization; regulatory sequences
 - 6.2.2 Intergenic sequences
 - 6.2.2.1 Unique sequences
 - 6.2.2.2 Repetitive sequences: Highly repeated sequences – satellite, minisatellite and microsatellite DNAs; Moderately repeated sequences (e.g. SINEs and LINEs)
- 6.3 DNA denaturation-renaturation kinetics and genome complexity; in situ hybridization.
- 6.4 Organelle genomes-mitochondrial and plastid DNAs

Module VII. DNA Replication, repair and recombination (16hrs)

- 7.1 Prokaryotic and Eukaryotic DNA replication
- 7.2 DNA replication machinery.
- 7.3 Enzymes and accessory proteins involved in replication
- 7.4 DNA damage and repair
 - 7.4.1 Direct reversal: photo reactivation, adaptive response
 - 7.4.2 Excision repair
 - 7.4.3 Mismatch repair
 - 7.4.4 SOS repair and mutagenesis
 - 7.4.5 ERcombination repair; Rec A and other recombinases
- 7.5 Damage signaling and checkpoints
- 7.6 DNA repair-associated disorders

Module VIII. Transcription and RNA processing (10 hrs)

- 8.1 Prokaryotic and eukaryotic transcription
- 8.2 Binding the transcription complex-promoters, factors and RNA polymerases.
- 8.3 Regulation of transcription
- 8.4 Sigma factor and its role in prokaryotic transcription.
- 8.5 Post-transcriptional processing of RNA precursors, spliceosomes.
- 8.6 Reverse transcription - Teminism

Module IX. Translation-gene expression (15 hrs)

- 9.1 Prokaryotic and Eukaryotic translation
- 9.2 The translation machinery
- 9.3 Mechanism of initiation, elongation and termination
- 9.4 Co-and post translational modifications of proteins.
- 9.5 Hormonal regulation of protein synthesis.

Module X. Gene Regulation Mechanisms (10 hrs)

- 10.1 Gene regulation in phages, viruses, prokaryotes and eukaryotes at transcriptional and translational levels.
- 10.2 Gene regulatory proteins and DNA-binding domains (Zinc-finger motif, Zipper motifs and Helix-loop-helix motif)
- 10.3 Transcription signals – TATA Box, CAAT BOX., Enhancers.
- 10.4 Role of chromatin in gene expression and gene silencing; RNA interference (RNAi).
- 10.5 Knock-out genes

SEMESTER I PRACTICALS

APZO 2P I

Practical I: Biochemistry, Biophysics, Instrumentation, Computer Application and Bioinformatics

A. Biochemistry

1. Titration curve of acetic acid. Titration of a measured volume of acetic acid with sodium hydroxide (NaOH) to determine the amount of acid in the given solution and pKa of acetic acid.
2. Determination of the isoelectric pH of the given amino acid by titration method.
3. Estimation of DNA/RNA
4. Quantitative estimation of glycogen of a tissue.
5. Quantitative estimation of blood glucose.
6. Quantitative estimation of protein(tissue/ serum).
7. Determination of acid value of the given fat.
8. Determination of saponification value of the given fat.
9. Estimation of serum cholesterol using a standard protocol
10. Determination of the Michaelis constant (Km value) for the digestion of case in by trypsin.
11. Estimation of acid/ alkaline phosphatase or transaminases.
12. Preparation of buffer solution for a given pH.

B. Biophysics, Instrumentation, Computer Application and Bioinformatics

1. Micrometry: Measurement of microscopic objects using micrometer.

2. Separation of haemolymph of serum protein by gel electrophoresis.
3. Sketching of biological specimens using a camera Lucida.
4. Quantification estimation of Na, K, Ca of the given sample with the help of flame photometer/ spectrophotometer.
5. Preparation of tables and bar diagrams using suitable softwares, from the data provided.
6. Statistical Analysis (Chi-square, t-test, correlation, regression, standard deviation and standard error) of the given data using suitable softwares. E.g. PH Stat
7. Preparation of histogram, frequency polygon and pie diagram using appropriate software.
8. Molecular visualization using any suitable tools like Rasmol.
9. Study of FASTA format, Gen Bank Database, Identify and evaluate features of NCBI, BLAST.
10. Phylogenetic tree construction of any taxa using any selected annotated genes.
11. Analysis of ligand binding characteristics using any programmes like AutoDoc.

4. Jayaraman, Practical Biochemistry.

SEMESTER II PRACTICALS

APZO 2 P II

Practical II: ADVANCED PHYSIOLOGY , FUNCTIONAL ANATOMY, SYSTEMATICS AND EVOLUTIONARY BIOLOGY, GENETICS, CELL AND MOL. BIOLOGY

ADVANCED PHYSIOLOGY , FUNCTIONAL ANATOMY

1. Effect of salivary amylase on starch (colorimetric)
 - a) Influence of temperature and calculation Of Q10
 - b) Influence of pH
2. Transport of glucose through intestinal wall (everted gut sac) of a suitable animal
3. Observation of ciliary movement of bivalve in relation to temperature and pH
4. Effect pH/ temperature on muscle contraction.
5. Recording of heart beat and the effect of drugs (acetylcholine and adrenaline) in chick or other suitable animal.
6. Effect pH different concentrations of NaCl (0.1% to 2%) on the diameter of RBCs using micrometry.
7. Enumeration of RBCs in vertebrate blood
- 8 Enumeration of WBCs in vertebrate blood
9. Blood histology of earthworm/cockroach, fish and chick.
10. Differential count of WBCs
11. Studies on feeding-Mounting of mouth parts of housefly, honey bee and mosquito in relation to food and feeding.

GENETICS , CELL AND MOECULAR BIOLOGY

12. Chromosome study- Squash preparation of Drosophila/Chironomus larva.
13. Study of meiosis – Squash preparation of grass hopper testis.
14. Histological prepaion of liver,gut and muscle.
15. Histochemical localization of glycogen and protein.
16. Extraction of DNA/RNA from tissue and Gel electrophoretic seperation.
17. Karyotyping using
18. lymphocyte culture/ any suitable tissue of any animal groups.

SYSTEMATICS AND EVOLUTIONARY BIOLOGY

19. Collection and identification of the following using standard keys:
 - A Insects (3 nos)

B. Prawn (2 nos)

C. Crab (2 nos)

D. Fishes (3 nos)

20. Study of preservation media and tools and materials for taxidermy

21 Comparative study of prokaryotic and eukaryotic cells by staining and mounting (evolutionary significance).

Semester III

Paper I -APZO 321 MICROBIOLOGY & BIOTECHNOLOGY [100 Hrs]

PART A. MICROBIOLOGY [40 Hours]

Module I. Introduction to Microbiology

- 1.1 Scope and history of Microbiology; Characteristic features and classification of Microbes, Bergey's manual- ICTV; Mycoplasma, Extremophiles and Microalgae. Survey of harmful and beneficial microbes (self study)

Module II. Viruses (4 Hours)

- 2.1 General Properties of Viruses, Viroids, Prions (self study)
- 2.2 Structure and chemical composition of the viruses, Viral Capsid, Viral Envelope, Viral Nucleic Acids.

Module III. Bacterial Cell Structure & Function (10 Hours)

- 3.1. Bacterial cell: structure and function of different components -Cell wall, cell membrane, cytoplasmic inclusions, nucleoid, pili, flagella, fimbriae, capsules, slime layers etc.,
- 3.2 Gram staining, differences between gram positive and negative bacteria.

Module IV. Microbial Nutrition & Growth (4 Hours)

- 4.1. Nutrition and nutritional requirements of microorganisms
- 4.2. Types of culture media.
- 4.3. Microbial growth – overview of cell growth, generation time, measurement of growth.
- 4.4. Typical growth curve, continuous culture, effect of environmental factors on growth. Stress response

Module V. Industrial & Environmental Microbiology (15 Hours)

5.1: Industrial Microbiology

- 5.1.1 Application of microbes in industry (self study)
- 5.1.2 Concept of fermentation. Types of fermentation – submerged, solid state – mention briefly.
- 5.1.3 Basic design and types of fermenters.

- 5.1.4 Products of Industrial Microbiology such as Alcohol, Antibiotics (e.g. Penicillin), Organic acids (e.g. Acetic acid, Lactic acid).
- 5.1.5 Microbiology of milk & foods: Microbial spoilage of food and basic approaches to food
- 5.1.5** Preservation. Preservation of milk - Pasteurization techniques. Probiotics.

5.2: Environmental Microbiology

- 5.2.1 Introduction to soil and aquatic microbiology. Role of microbes in elemental cycles.
- 5.2.2 Microbiology of waste treatment. Brief account of microbial treatment of waste water and solid wastes.
- 5.2.3 Microbes in bioremediation

Module VI Medical Microbiology (7 Hours)

- 6.1 Host-microbe interaction – process of infection
- 6.2. Exotoxins-classification and mechanism of action of exotoxins. e.g. Diphtheria, Botulinum, Tetanus, and Cholera toxins. Mention endotoxins
- 6.3. Control of Microorganisms – various physical & chemical methods.
- 6.4. Use of antibiotics and other antimicrobial drugs.
- 6.5. Drug resistance and emergence of multiple drug resistance – recent cases of TB (XDR, TDR); NDM etc.

PART B. BIOTECHNOLOGY (60 Hours]

Module VII. Introduction to Biotechnology (4 Hours)

- 7.1. History of Biotechnology (self study).
- 7.2 Broad areas of BT – traditional and modern; types – plant biotechnology, animal biotechnology and microbial biotechnology.
- 7.3 India's Biotechnology Policy. Biotechnology Regulatory Agencies in India.

Module VIII. Molecular Cloning (18 Hours)

- 8.1. Gene cloning – basic steps in gene cloning.
- 8.2. Vectors – types and characteristics e.g. plasmids, phages, hybrid vectors, artificial chromosomes.
- 8.3. Enzymes used in gene cloning

- 8.4. Techniques of gene transfer – calcium chloride transformation, lipofaction, microinjection, electroporation, shotgun cloning, *Agrobacterium* mediated transfer, etc.
- 8.5. DNA libraries: Genomic libraries and cDNA libraries. Application of genomic libraries and cDNA libraries,

Module IX: Techniques in rDNA technology (18 hrs)

- 9.1 Polymerase chain reaction and its types - RT-PCR, qRT-PCR,
- 9.2 Molecular marker techniques: SNP, VNTR, RFLP, AFLP, RAPD; SSR, STMS, FISH and GISH
- 9.3 Chromosome walking and jumping
- 9.4 Nucleic acid sequencing (Maxam and Gilbert method, Sangers method); Automated DA sequencers.
- 9.5 Gene expression analysis – Western blotting, Southern blotting, Northern blotting, Immuno-blotting, and microarrays.
- 9.6 Application of genetic engineering.

Module X. Recent Trends in Biotechnology (8 Hours)

- 10.1. Synthetic Biology – description and developments in the area.
- 10.2. Artificial life – concept and achievements
- 10.3. DNA Barcoding – concept and experimental details with examples.
- 10.4. Transgenic animals and its practical applications
- 10.5. GMOs and GM Foods – pros and cons.
- 10.6. Gene therapy
- 10.7. Microbial warfare – bio-weapons and bioterrorism
Bioethics: Ethical, legal and social issues of biotechnology (self study).

Module XI. Cell culture techniques (12 Hours)

- 11.1 Animal cell culture: Primary and secondary cell cultures, 2D and 3D cultures, cell lines, cell strain, immortalized cell cultures, transformed cell lines.
- 11.2 Media – media components and physico-chemical parameters. Growth factors promoting proliferation of animal cell cultures; Animal bioreactors.
- 11.3 Cryo-preservation of cultures; Cell viability assays - measurement of viability and toxicity --MTT assays, comet assay, DNA laddering assay, Caspase assay. Assessment of cell death.

11.4 Stem cells: types of stem cells; stem cell niche; Medical prospects of stem cell research.

11.5 Lab safety and maintenance.

APZO 322

ECOLOGY, ETHOLOGY AND BIODIVERSITY CONSERVATION [100 Hrs]

PART 1: ECOLOGY [25 Hours]

Topics for self study

- a. Biotic and abiotic factors and their interactions.
- b. Structure, basic components, their interactions and inter-relations. Fundamental concepts relating to energy - first and second laws of thermodynamics, entropy.
- c. Gaseous and sedimentary cycles
- d. Characteristics of population: density, natality, mortality, biotic potential, environmental resistance, growth forms, immigration, emigration and migration.
- e. Characteristics: Species diversity, stratification, dominance, boundaries, ecotone and edge effect, ecological indicators.
- f. Ecosystem development

Module 1: Ecological Energetics (8 Hrs)

- 1.1 Solar energy and photosynthetic production, efficiency of energy capturing, chemosynthesis.
- 1.2 Energy flow - features of energy flow (unidirectional flow and loss of energy as heat) and pathways of energy flow.
- 1.3 Productivity - primary production and production efficiency, secondary production, standing crop.
- 1.4 Food chain (grazing, detritus and auxiliary food chains), food webs, trophic levels and ecological pyramids (pyramid of numbers, pyramid of biomass and pyramid of energy [**self study**]).
- 1.5 Classification of ecosystems based on energy input (natural unsubsidised and subsidized solar powered ecosystems, human subsidised solar powered ecosystem and fuel powered urban and industrial systems).

Module II: Concepts of Habitat, Niche and Guild (7 Hrs)

- 3.1 Habitat, microhabitat and niche. Different types of niches: spatial niche, trophic niche, species niche, multidimensional niche, fundamental and realised niche.

- 3.2 Niche overlap, Gause's principle-Lotka -Voltera model, resource partitioning, competition hypothesis, concept of Guild, character displacement, ecological equivalents.

Module IV: Species Interactions (10 Hrs)

- 4.1 Intra and interspecific interactions, Types of Interspecific interactions – (Positive, Negative and Neutral).
- 4.2 Types of interactions:
- 4.3 Herbivory, Carnivory, Pollination.
- 4.4 Co-evolution,
- 4.5 r-selection, k- selection.

PART II: ETHOLOGY [35 Hours]

Topics for self study

History, development and applications; Motivation and models of motivation; reflexes, imprinting, habituation; neural mechanisms in behaviour; hormones and behaviour; Sociobiology: social groups – merits and demerits, features of organised groups; social groups in mammals, social stress; pheromones and chemical communication.

Module V: Learning (5 Hrs)

- 5.1 Classification of learning: Imprinting, habituation, imitation (self study), classical conditioning, instrumental/operant conditioning, cognitive learning, latent learning, insightful learning.

Module VI: Nervous System and Behaviour (12 Hrs)

- 6.1 Stimulus filtering, sign stimulus, innate release mechanism and fixed action plans (FAPs).
- 6.2 Neural centres (hypothalamus and limbic system) and mechanisms in behaviour: drinking, feeding, learning, memory and cognition.

Module VII: Complex Behaviour Patterns (10 Hrs)

- 7.1 Orientation, Navigation and homing.
- 7.2 Migration (Fishes and birds).
- 7.3 Biological rhythms – biological clock, circadian, circannual, lunar, tidal and seasonal periodicities, sleep and arousal, genetics of biological rhythms.

Module VIII: Environment, genetics and Evolution of behaviour (8 Hrs)

- 9.1 Habitat selection and territoriality.
- 9.2 The Evolution of communication; Development of bird song.
- 9.3 The evolution of reproductive behaviour and mating systems.

PART III: BIODIVERSITY [40 Hours]

Module IX: Biodiversity (15 Hrs)

- 9.1 Introduction: Definition, levels of biodiversity (genetic diversity, species diversity and ecosystem diversity), values of biodiversity (self study).
- 9.2 Diversity indices: Alpha diversity, Beta diversity and Gamma diversity; the species diversity and ecosystem stability.
- 9.3 Biodiversity in India: Major biogeographic zones of India; India as a mega diversity nation; hot spots of biodiversity – characteristics; an outline of the features and biodiversity of hot spots in India (Western Ghats and Eastern Himalaya).
- 9.4 Features, structure and biodiversity of some of the Indian ecosystems: Terrestrial ecosystems (forest, grassland, desert), Aquatic ecosystems fresh water, marine, estuarine).

Module X: Conservation Biology (13 Hrs)

- 10.1 Depletion of biodiversity: Current estimates of species loss, causes of biodiversity loss, impacts of biodiversity loss, Strategic species concepts: Keystone species, indicator species and umbrella/flagship species.
- 10.2 Strategies of conservation: *in situ* and *ex situ* conservation, Gene Banks, establishment of protected areas, habitat conservation, captive breeding, pollution control, legislative conservation, creating public awareness and other relevant measures.
- 10.3 An evaluation of the “Project Tiger” and “Project Elephant” programmes.
- 10.4 World conservation strategy (1980)
- 10.5 National Biodiversity Action Plan 2008: a brief outline of objectives & plans

Module XI: International Conventions & Treaties for Conservation of Biodiversity (12 Hrs)

- 11.1 Stockholm declaration on human Environment (1972), Convention on Regulation of Antarctic Marine Resources Activities (RAMRA, 1986), Moduleed Nations

- World Charter for Nature (1982), Kyoto Protocol and Framework Convention on Climate Change (UNFCCC). Brundtland Report (1987).
- 11.2 Earth summit (1992) – detailed study - Rio Declaration on Environment and Development, Agenda 21, Forest Principles, Convention on Biological Diversity.
- 11.3 Species based treaties: Migratory Bird Treaty Act (MBTA) of 1918, International Convention for the Regulation of Whaling (ICRW), Washington, 1946, Convention for the Conservation of Antarctic Seals, 1972, Convention on International Trade on Endangered Species (CITES, 1975),
- 11.3 Ecosystem based treaty: Ramsar Convention (1981) – Ramsar sites in India and Kerala

APZO 323

IMMUNOLOGY AND DEVELOPMENTAL BIOLOGY (100 Hrs)

IMMUNOLOGY (50 Hrs)

Module 1 Introduction to Immune System (self study)

- 1.1 Types of immunity, innate and acquired immunity; passive and active immunity; humoral and cell-mediated immunity.
- 1.2 Organs of immune system: Primary and Secondary lymphoid organs.
- 1.3 Brief account on immune cells: types and production.

Module II Immunogens (Antigens) (8 hrs)

- 2.1 General properties, Structure and function, variability and diversity.
- 2.2 Factors affecting antigenicity.
- 2.3 Epitopes and Haptens.
- 2.4 Adjuvants and their role in enhancing immunogenicity.

Module III Immunoglobulins (antibodies) (14 hrs)

- 3.1 General Properties-Structure and functions
- 3.2 Different classes of immunoglobulines (1gA, 1gD,1gE,1gG and 1gM)
- 3.3 Genetic basis of antibody diversity: Immunoglobulin gene organization; Gene rearrangement and expression.
 - 3.3.1 Somatic recombination: V (D) J recombination and functional diversity
 - 3.3.2 Somatic hyper mutation
 - 3.3.3 Class switching
- 3.4 Polyclonal & Monoclonal antibodies, abzymes
- 3.5 Hybridoma technology – technique and applications
- 3.6 Antibody engineering

Module IV Antigen-antibody interactions (4 hrs)

- 4.1 Primary and secondary immune responses
- 4.2 Theories of antibody formation (Directive theory, clonal selection theory etc.)

Module V antigen processing and presentation (8 hrs)

- 5.1 Role of antigen presenting cells; cytosolic pathway and endocytic pathway.

- 5.2 Immune response during bacterial (tuberculosis), parasitic (malaria) and viral (HIV) infections,

Module V. Complement System (2 hrs)

- 5.1 Complement systems-General features
5.2 Classical and alternate pathways, complement receptors, biological effects of complement, complement deficiencies.

Module VI. Transplantation (8 hrs)

- 6.1 Classification of grafts
6.2 Major Histocompatibility Complex (MHC) and MHC proteins; role in tissue transplantation; Mechanism of graft retention and rejection.
6.3 General immunosuppressive therapy.

Module VII. Defects in Immune Mechanisms (6 hrs)

- 7.1 Congenital and acquired immunodeficiencies,
7.2 Auto immune diseases

DEVELOPMENTAL BIOLOGY (50 HRS)

Module VIII Introduction (4 hrs)

- 8.1 Definition, history, Scope of embryology and Practical applications (self study)
8.2 The evolution of developmental patterns in unicellular protists; origin of sexual reproduction. Developmental patterns among animals-brief survey (asexual means; parthenogenesis; sexual means; gonochorism, hermaphroditism, metamorphosis, uterine development in mammals)

Module IX. Fertilization (3 hrs)

- 9.1 Events in fertilization
2.1.1 Cytoplasmic changes
2.1.2 Nuclear changes
9.2 Prevention of polyspermy
9.3 Significance of fertilization

Module X: Basic concepts of development: (4 hrs)

- 10.1 Potency, commitment, specification, induction, competence, determination and differentiation.

- 10.2 Genomic equivalence and differential gene expression; the cytoplasmic determinants; imprinting.

Module XI Developmental Model Systems (20 hrs)

- 11.1 Genetic control of development (Self study).
3.3.1 Gene action in development of *Drosophila*:- Maternal effect genes; Segmental genes (gap genes, pair-rule gene and segment polarity gene) and Homeotic genes (homeobox and homeodomains)
3.3.2 Hox cluster genes in vertebrates
- 11.2 Early development of *Drosophila*-Egg, cleavage, mid-blastula transition, gastrulation
- 11.3 Early development of *Caenorhabditis elegans*-Egg, cleavage and gastrulation.
- 11.4 Cell aggregation and differentiation in *Dictyostelium*
- 11.5 Axes and pattern formation in *Drosophila*, Amphibia and chick.
- 11.6 Vulva formation in *Caenorhabditis elegans*,

Module XII Embryonic Induction (5 hrs)

- 12.1 Types of embryonic induction – Primary, Secondary and Tertiary Induction (Experiments of Spemann and Mangold) (self study)
- 12.2 Functions of organizer: Nieuwkoop centre; the diffusible proteins of the organizer 1; the BMP inhibitors.

Module XIII: Medically assisted human reproductive technologies (12 hrs)

- 13.1 Conventional in vitro fertilization and embryo transfer (IVF-ET) – general protocol (Patient selection, manipulation of menstrual cycle, superovulation, oocyte retrieval, preparation of semen sample, IVF treatment, embryo transfer.
- 13.2 Gametic Intrafallopian Transfer (GIFT)
- 13.3 Zygotic Intrafallopian Transfer (ZIFT)
- 13.3 Tubal Embryo stage Transfer (TET)
- 13.4 Intra-cytoplasmic sperm injection (ICSI)

Module XIV Cloning experiments in animals (2 hrs)

- 14.1. Cloning in animals; prospects and demerits.
- 14.2. Different types of cloning(seminar)

SEMESTER 3: PRACTICALS

APZO 4P III: Microbiology, Biotechnology, Immunology & Developmental Biology, Ecology, Ethology and Biodiversity Conservation

Microbiology & Biotechnology

1. Techniques for Isolation of bacteria – serial dilution, pour plate, spread plate techniques.
2. Enumeration of bacteria from water and soil.
3. Motility Testing – hanging drop method.
4. Gram staining.
5. Determination of quality of milk – methylene blue reductase test.
6. Biochemical tests – catalase test, kovac's oxidase test, gas production etc.
7. Isolation of DNA from plant/animal tissue.
8. Plasmid isolation.
9. Care and maintenance of microbiology and cellculture lab and glasswares.
10. Medium preparation for microbiology and cell culture.

11. Primary cell culture.
12. Lymphocyte isolation ,culturing , cell counting.
13. Cell viability- Trypan blue.
14. Cryopreservation.
15. Cytotoxicity assay- MTT assay,staining techniques

Immunology

1. Antigen-antibody interaction in vitro and identification of blood groups.
2. Blood film preparation and identification of cells.
3. Detection of pregnancy using kits.
4. Immuno-diffusion and Immuno-electrophoresis

Developmental Biology

1. Induced ovulation and artificial fertilization (any model).
2. Preparation of temporary whole mounts of chick blastoderm
3. Vital staining of chick blastoderm and tracing the development of stained parts (window method)
4. Effect of drugs on heart beat of chick embryo.
5. Study of different types of eggs: insect egg, frog's egg, hen's egg, mammalian egg- using models/charts
6. Morphological and histological studies of different placental types of mammals (3 numbers)
7. Identification of cross sections of chick embryo through heart, eye and ear.

Ecology, Ethology and Biodiversity Conservation

1. Estimation of Primary productivity using dark and light bottles.
2. Description of ecological adaptations of any 10 organisms.
3. Habituation in *Pila* / alarm response in ants or fishes / maize learning in rats.
4. Study of biodiversity indices:
 - a) Population
 - b) Density and relative density
 - c) Frequency and relative frequency
 - d) Abundance and distribution
 - e) Modified similarity Index

f) Shannon-Wiener Index

5. Composition assessment of the Taxonomic diversity/biodiversity in a habitat (grass land, wet land, etc.).
6. Assessment of Invertebrate and Vertebrate diversity in your locality (e.g. campus).
7. Quantitative estimation of plankton.
8. Poster Presentation on a relevant topic (e.g. International conventions and treaties, species interactions, biodiversity loss, etc.).

Semester IV
SPECIAL SUBJECT: ENVIRONMENTAL SCIENCE
APZO 421.A
POLLUTION BIOLOGY & ENVIRONMENTAL PHYSIOLOGY
(Total 100 Hrs)

Module I Introduction (5 hrs)

- 1.1 Environmental pollution – Introduction, concepts and definitions, sources: natural and artificial; classification of environmental pollutants; role of man in environmental pollution.
- 1.2 Food Safety: Adulteration of food; food additives and contaminants.

Module II Air Pollution (15 hrs)

- 2.1 Chief air pollutants-occurrence, sources and effects
- 2.2 Interaction of air pollutants in the atmosphere-Photochemical reactions-Formation and effects of secondary pollutants and photochemical smog.
- 2.3 Effects of air pollutants on materials, building metals, vegetation and human health; a brief survey of major air pollution episodes
- 2.4 Air pollution abatement technologies – Design and working of bag filters, electrostatic

Module III Noise pollution (5 hrs)

- 3.1 Sources
- 3.2 Effect of noise pollution on materials, animals and humans.
- 3.3 Sonic boom.
- 3.4 Abatement strategies

Module IV: Water pollution (35 hrs)

4.1 Organic pollution (15 hrs)

- 4.1.1 Origin and sources of organic pollutants – Biodegradable and non-biodegradable; Domestic, agricultural and industrial sources
- 4.1.2 Biochemical Oxygen Demand (BOD)
- 4.1.3 Chemical Oxygen Demand (COD) – Importance and method of estimation.
- 4.1.4 Effects of organic pollution on aquatic systems
- 4.1.5 Eutrophication – Sources and effects.

- 4.1.6 Biocides, fungicides and herbicides - Sources and effects
- 4.1.7 Biomagnifications: Toxic effects on non-target organisms and hazards to man.

4.2 Industrial pollution (20 hrs)

- 4.2.1 Heavy metals-Effects of various heavy metals (such as Hg, Pb, Cd, As, Cr, Zn, etc) in the ecosystem and human population
- 4.2.2 Fluoride pollution on human life
- 4.2.3 Thermal pollution-sources, effects and control.
- 4.2.4 Oil spills-sources, effects and control.
- 4.2.5 Water pollution abatement technology
 - 4.2.5.1 Primary, Secondary and tertiary treatment systems
 - 4.2.5.2 Design and operations of screens, grit chambers, sedimentation tanks and oxidation ponds.
 - 4.2.5.3 Design and operations of biological treatment systems like aerated lagoons, activated sludge process, trickling filters and sludge digestion

Module V: Radioactive Pollution (5 hrs)

- 5.1 Sources of nuclear radiation
- 5.2 Biological effects of ionizing radiations and non-ionizing radiations.
- 5.3 Nuclear waste disposal

Module VI: Terrestrial Pollution (10 hrs)

- 6.1 Sources and causes of land pollution.
- 6.2 Solid wastes and disposal (garbage, ashes, rubbish, street litter, agricultural waste, mining waste and industrial wastes).
- 6.3 Strategies for control of solid waste pollution

Module VII: Environmental Physiology (25 hrs)

7.1 Temperature adaptations (5 hrs)

- 7.1.1 Morphological and physiological adaptations:
Relation between body size and metabolic rate. Temperature and metabolic rate: Thermal acclimation; Enzymatic acclimation;
- 7.1.2 Temperature classifications of animals-Homoiotherms and Poikilotherms;
Thermal migration

7.1.3 Implications of global warming on animals.

7.2 Pressure adaptations (5 hrs)

7.2.1 Adaptations to hyper baric stress with particular reference to deep sea organisms.

7.2.2 Biochemical mechanisms of animals to high altitudes (hypo aria and hypoxia)

7.3 Osmoregulation and ionic regulation (5 hrs)

7.3.1 Osmoregulation in fresh water, marine estuarine and terrestrial animals

7.3.2 Sodium pump, Na⁺/K⁺ ATPase in relation to salinity adaptations.

7.4 Eco-physiological adaptations (10 hrs)

7.4.1 Mimicry and colouration

7.4.2 Echolocation

7.4.3 Bio-luminescence

7.4.4 Electric organs.

APZO 422.A
ENVIRONMENTAL MANAGEMENT

Total Hours: 100

Module I Resources of Earth (15 hrs)

- 1.1 Renewable and non-renewable resources
 - 1.1.1 Forests, wild life, endangered species fisheries
 - 1.1.2 Fossil fuels, minerals-their over-exploitation for domestic, agricultural and industrial purposes.
 - 1.1.3 Water resources-protection of water shed, reclamation of sewage and waste and water management in India.
- 1.2 Conservation of natural resources
- 1.3 Remote sensing for resource management

Module II Human exploitation of earth's resources (15 hrs)

- 2.1 Human interferences in ecosystems- consequences of over-exploitation
- 2.2 Brief account of weather modifications, desalination, artificial rain making, acid rain, green house effect and its consequences and destruction of ozone umbrella.

Module III Biological Conservation and Management (20 hrs)

- 3.1 Principles of conservation
- 3.2 Conservation and economic use of energy and energy audit
- 3.3 Ecological problems due to intensive aquaculture – importance trawling ban
- 3.4 Conservation of wild life-present status and strategies of conservation
- 3.5 Deforestation and its consequences-need for scientific management and conservation of forests.
- 3.6 Biodiversity in India-Biodiversity conservation-in situ and ex-situ methods.
- 3.7 Biodiversity registering and patenting of biodiversity.

Module IV: Environmental Policy and Education (15 hrs)

- 4.1 Environmental policy-social, economic and legal aspects
- 4.2 Environmental laws and their enforcement
- 4.3 Environmental awareness-role of Government, media and voluntary organizations

Module V: Environmental Impact Assessment and Sustainable Development (15 hrs)

5.1 Environmental Impact Assessment (EIA)

- 5.1.1 Definition, aim, principles and concepts of EIA
- 5.1.2 Elements of environmental impacts
- 5.1.3 Methods for preparing EIA-Check list method, Werner-Prestroit study
- 5.1.4 EIA Process making inventories, sampling and data processing, impact prediction and stimulation.

5.2 Sustainable Development

- 5.2.1 Concepts and dimensions
- 5.2.2 Basic needs
- 5.2.3 Unavoidable impacts and imperatives relating to sustainable development.
- 5.2.4 Alternative strategies

Module VI Environmental Biotechnology (20 hours)

6.1 Pollution abatement using microbes

- 6.1.1 Sewage treatment
- 6.1.2 Solid waste disposal
- 6.2 Soil enrichment by using microbes
- 6.3 Genetic engineering of nitrogenase gene ('nif' genes) and nodulation genes.
- 6.4 Microbial insecticides
 - 6.4.1 Insecticidal toxin of *Bacillus thuringiensis* and genes) and nodulation genes.
 - 6.4.2 Baculoviruses as biocontrol agents and their genetic engineering for improved biocontrol.

Semester 4: Practicals
SPECIAL SUBJECT: ENVIRONMENTAL SCIENCE

Practical 1: APZO 4 P IV
Pollution Biology & Environmental Physiology

(10 Practicals to be carried out)

1. Analysis of soil texture using micrometry.
2. Determination of moisture content of soil.
3. Determination of soil pH (different soil samples)
4. Determination of organic carbon.
5. Determination of porosity/water retaining capacity of soil
6. Determination of chlorine in water.
7. Determination of H₂S in water
8. Determination of Ammonia in water
9. Short term bioassays and determination of LC₅₀ of fish exposed to a given pollutant.
10. Effect of soil pollution on the population of earthworms.
11. Study of indicator organisms.
12. Effect of pollution on the Oxygen consumption of fishes.
13. Temperature/pH preferences of fishes.
14. Field work-Students are expected to make a field study on the problem of environmental pollution in their area.

Note: The students should submit the field study report at the time of examination.

Practical II APZO 4 P V: Environmental Management

(10 Practicals to be carried out)

1. Determination of pH of water
2. Determination of electrical conductivity of water
3. Determination of turbidity of water
4. Determination of salinity of water
5. Determination of hardness of water
6. Determination of BOD and COD of polluted water.
7. Instrumentation: Principles, use and working of the following instruments.
 - 8.1 pH meter
 - 8.2 Electrical conductivity meter.
 - 8.3 Flame photometer
 - 8.4 Hygroscopic soil thermometer.
8. Estimation of primary productivity (Chlorophyll method)
9. Estimation of secondary productivity
10. Construction of pyramids of numbers and biomass from a pond collection.
11. Species diversity estimation with reference to a fresh water pond/soil.

SEMESTER -IV

SPECIAL SUBJECT: ENDOCRINOLOGY

APZO 421.B VERTEBRATE ENDOCRINOLOGY

Total hours: 100

Module I Introduction (5 hrs)

1. Historical perspective
2. General Classes of chemical messengers – definition - short account
Peptide hormones, steroid hormones, bioamines, eicosanoids, chalcones, neurotransmitters, neuropeptides, neurosteroids, neurohormones, lumones, phytohormones, synthetic hormones.

Module 2 Vertebrate endocrine glands (30hrs)

1. Morphology and anatomy of endocrine glands
2. Biosynthesis of hormones (Mention key enzymes)
3. Functions of hormones
4. Disorders of hormonal imbalance
5. Hypothalamus and its secretions
6. Hypothalamo-hypophysial interaction.
7. Eicosanoids – Biochemistry and biological action. Prostaglandins, prostacyclins, thromboxanes, leukotriens.
8. A brief account the evolution of endocrine glands

Module 3 Mechanism of hormone action (30hrs)

1. General and Molecular mechanism of action of amines, polypeptide and steroid Hormones
2. Hormone receptors – Receptors as mediators of endocrine signals – Classification of endocrine receptors. Measurement of receptor ligand interaction.
3. Cell surface receptors (Mode of action of peptide hormones) Receptor structure – Regulation of receptor number.
4. Second messengers of hormonal action; Cyclic nucleotides; Inositol triphosphate; Diacyl glycerol; Genomic action of cAMP
5. Signal transduction - G proteins and dual control of adenylate cyclase; Receptor crosstalk
6. Receptor with tyrosine kinase activity, serine and threonine kinase activity
7. Receptors that are protein phosphatases
8. Receptors coupled with ligand gated ion channels
9. Direct membrane action of steroid hormones –non genomic action

Module 4 Cell growth factors (5hrs)

1. Types of growth factors-mechanism and its functional role in cellular activities:
2. Somatomedins – IGF: Epidermal Growth Factor (EGF) family; Transforming Growth factor
3. β family (TGF β); Platelet derived growth factor (PDGF); Fibroblast growth factor (FGF) – Nerve Growth Factor (NGF); Hepatocyte Growth Factor (HGF)

Module 5 Hormones and Cancer (10hrs)

1. Relationship of hormones to carcinogens and development of cancers from inappropriate hormonal treatment

2. Hormones related treatment of cancer
3. Oncogenes and hormonal function
4. Hormone receptor status of Breast Cancer
5. Ectopic production of hormones by tumour cells

Module 6 Functional Endocrinology (10hrs)

1. Role of hormones in behavior of animals
2. Hormonal control of reproduction
3. Hormonal involvement in evolution
4. Influence of hormones in development process

Module 7 Endocrine methodology (10hrs)

1. Methods and techniques in endocrine research
2. Histological and cytological methods; Surgical methods, Bioassays
3. Radio isotopic studies – RIA, ELISA, EIA
4. Nucleic acid approaches in endocrinology - Recombinant DNA techniques and genetic engineering.
5. Modern trends in endocrine research

References

1. Endocrinology – Mac.E. Hadley, Prentice Hall. International 2000

8. Hormones and Evolution – Barrington, 1979.
9. Hormones – Anthony – W. Norman and Gerald Litwark – Academic Press. 1997.

SPECIAL SUBJECT: ENDOCRINOLOGY

APZ0 422.B: PHYSIOLOGY OF REPRODUCTION

(With special reference to mammals)

APZ0 422.B

Total hours: 100

Module 1 Foetal and Embryonic Gonads and Genital Ducts (20 hrs)

1. 1. Comparative anatomy of genital system in vertebrates
1. 2. Origin of primordial germ cells
- 1.3. Differentiation of the testis: Germinal epithelium, interstitial tissue, Foetal androgens and role
- 1.4. Differentiation of ovary: Foetal estrogens and role
- 1.5. Origin and differentiation of the genital ducts: Wolffian duct, mullerian duct
- 1.6. Hormonal basis of sex differentiation
- 1.7. Histology, cytology and endocrinology of the foetal gonads
- 1.8. Disorders of sexual differentiation development: True hermaphroditism, Pseudohermaphroditism, Chromosomal errors and sex determination – Penile agenesis, Double Penis, Bifid Penis, Micropenis, Acruate Uterus, Double uterus.

Module 2 Physiology of Female Reproduction–I. Ovary & Reproductive cycles (12 hrs)

- 2.1. Anatomy of female reproductive system- Gross anatomy and histology of ovary
- 2.2. Ovarian hormones
- 2.3. Folliculogenesis and oogenesis and their hormonal control
- 2.4. Ovulation- Luteinization, Atresia
- 2.5. Reproductive cycles- Estrus and menstrual cycles- structural changes and hormonal control

Module 3 Physiology of female reproduction II Implantation, Pregnancy and Parturition (12 hrs)

- 3.1. Nidation, Desidualization
- 3.2. Placentation- Types, Placental hormones and their regulation
- 3.3. Physiology of pregnancy - Endocrine basis
- 3.4. Development of foetal membranes- Amnion, chorion, allantois and yolk sac
- 3.5. Physiology of parturition and endocrine control

Module 4 Physiology of female reproduction–III Mammary gland & Lactation (6 hrs)

- 4.1. Infantile mammary gland, Pubertal changes in mammary gland, Structure of adult mammary gland
- 4.2. Synthesis, composition and secretion of milk- galactopoesis- Milk let down
- 4.3. Hormonal regulation of lactation

Module 5 Physiology of Male reproduction: I. Testis, Reproductive tract and Accessory Reproductive Glands (15 hrs)

- 5.1. Anatomy of male reproductive system- Testis, Vasa efferentia, Epididymis, Vas Deferns, Ejaculatory ducts, Urethra, Penis
- 5.2. Accessory sex glands- Seminal vesicles, Prostate gland and Cowper's glands- Structure, cytology and functions

- 5.3. Histology of testis- Sertoli cells, Leydig cells and rete testis – structure and functions
- 5.4. Male sex act
- 5.5. Temperature regulation of testicular function
- 5.6. Testicular hormones- Androgens

Module 6 Physiology of Male Reproduction - Spermatology (10 hrs)

- 6.1. Spermatogenesis and its hormonal control
- 6.2. Structure of a typical mammalian sperm, Comparative morphology of sperms of mammals
- 6.3. Physiological maturation of sperm – initiation of motility and capacitation
- 6.4. Sperm motility and energetic- Factors affecting sperm motility
- 6.5. Biochemistry of semen

Module 7 Reproductive Behaviour (7hrs)

- 6.1. Concept of puberty
- 6.2. Adolescence- Somatic changes, psychological changes and hormonal changes
- 6.3. Senescence
- 6.4. Menopause

Module 8 Fertility regulation and Reproductive toxicology (8 hrs)

- 8.1. Disorders of male and female reproductive systems- Sexual dysfunction
- 8.2. Infertility in males and females – causes and curative measures
- 8.3. Birth control devices
- 8.4. Reproductive toxicology – effects of chemicals, drugs and alcohol on reproduction
- 8.5. Fertility regulation in farm animals

Module 9 Reproductive Health (10 hrs)

- 9.1. Sex Education and its importance
- 9.2. Adolescent sexual activity and adolescent stress management
- 9.3. Sexual harassment and its impacts
- 9.4. Sexually transmitted diseases

SEMESTER IV PRACTICALS
SPECIAL SUBJECT: ENDOCRINOLOGY

APZO4P.VI - Practical 1: Physiology of Reproduction with special reference to Mammals

1. Histology of testes of fish, calotes, chick and rat (any two animals)
2. Histology of ovary of fish, calotes, chick and rat (any two animals)
3. Dissection of male & female reproductive system of any suitable animal
4. Vaginal smear of rat
5. Sperm smear of any one vertebrate
6. Demonstration of induced ovulation in any one vertebrate

APZO4P.VII - Practical II Vertebrate Endocrinology

7. Dissection of endocrine glands in fish, calotes, chick and rat (any two animals)
8. Demonstration of glandectomy experiments in any two vertebrates
9. Simple experiment to study the effect of thyroxine, insulin and cortisol on blood glucose/total protein in fish or of any suitable animal
10. Preparation of single cell suspension of any one tissue for in vitro study
11. Histological study of endocrine gland using haematoxylin eosin stain in any two vertebrates
12. Disorders of endocrine glands (5 numbers for short notes)

SPECIAL SUBJECT: FISH BIOLOGY AND FISHERY SCIENCE

APZO 421.C: ICHTHYOLOGY

Module 1 Classification and distribution of fishes (10 Hours)

- 1.1. Scope and history of Ichthyology (self study)
- 1.2. Geographical distribution of fishes in marine and freshwater habitats
- 1.3. Distribution of fishes in marine and freshwater habitats in India and Kerala
- 1.4. Classification of fishes up to family- distinguishing characters with examples
- 1.5. Barcoding in fish taxonomy

Module 2 Adaptation of fishes to special conditions (10 Hours)

- 2.1. Deep sea fishes
- 2.2. Cave dwelling fishes
- 2.3. Hill stream fishes
- 2.4. Air breathing fishes
- 2.5. Venomous fishes
- 2.6. Larvicidal fishes and biological control
- 2.7. Schooling in fishes

Module 3 Functional morphology and bionomics of fishes (15 Hours)

- 3.1. Gross external anatomy of fishes
- 3.2. Body form diversity
- 3.3. Fins: types structure, function and modifications
- 3.4. Skin-structure and function
 - 3.4.1. Scalation: types of scales; structure, development and modifications
 - 3.4.2. Colouration-types of chromatophores, biological significance

Module 4 Food, feeding, digestion and growth in fishes (10 Hours)

- 4.1. Basic anatomy of digestive system of a cartilaginous and a bony fish
- 4.2. Food and feeding habits- natural food, feeding habit and adaptations; feeding in relation to season ,growth, sex and breeding; gastro-somatic index
- 4.3. Digestion absorption and utilization of food
- 4.4. Growth in fishes- length and growth relationship, growth curve and growth studies using scales and condition factor

Module 5 Excretion and osmoregulation (5 Hours)

- 5.1. Brief account of structure and function of kidney
- 5.2. 5.2. Hormonal control of excretion and Osmoregulation

Module 6 Locomotion (10 Hours)

- 6.1. Types of locomotion- swimming and non-swimming
- 6.2. Body form and locomotion
- 6.3. Fins and locomotion
- 6.4. Swim bladder and buoyancy- origin and function
- 6.5. Weberian ossicles and its significance

Module 7 Sense organ in fishes (10 Hours)

- 7.1. Lateral line sense organs, Ampullae of Lorenzini,
- 7.2. Chemo, mechano, thermo, and electro receptors
- 7.3. Structure of eye and visual pigments

Module 8 Endocrine glands in fishes (10 Hours)

- 8.1. Structure and function of – Pituitary gland, ultimobranchial gland, Caudal neuro- secretary cells, urophysis, corpuscles of stannous, Inter renal tissue and chromaffin tissue, islets of Langerhans, thyroid gland, gonad and pineal organ

Module 9 Reproduction in fishes (10 Hours)

- 9.1. Sexuality- hermaphroditism, unisexuality and bisexuality
- 9.2. Gonads- phases of maturity, length at first maturity, gonado-somatic index, fecundity
- 9.3. Reproductive behavior-sexual dimorphism, courtship, parental care, nest building

Module 10 Fish genetics (10 Hours)

- 10.1. Sex determination in fishes
- 10.2. Recent trends and techniques of hybridization
- 10.3. Chromosome manipulation in fishes
- 10.4. Transgenesis in fishes

SPECIAL SUBJECT: FISH BIOLOGY AND FISHERY SCIENCE

APZO 422.C: FISHERIES AND AQUACULTURE

FISHERIES

Module 1 Fishery Science (15 Hours)

- 1.1 Importance of Fishery science-Inland fisheries, Marine fisheries, capture fisheries and culture fisheries
- 1.2 Inland capture fisheries- Riverine fisheries, reservoir fisheries, cold water fisheries and estuarine fisheries
- 1.3 Marine capture fisheries in India- Offshore and deep sea fisheries- fin fish fishery, shell fish fishery (crustacean and molluscan)

Module 2 Methods of fishing (10 Hours)

- 2.1 Indigenous fishing crafts of India: sea fishing crafts- Catamaran, Musula boat, caravel boats, Dinghi, Dug-out canoes, plank built canoes, out trigger canoes
- 2.2 Inland fishing crafts: Dug out and plank built boats
- 2.3 Mechanised Indian fishing crafts- fishing vessel characteristics
- 2.4 Indigenous fishing gears in India: Traditional and conventional; sea fishing gears and inland fishing gears

Module 3 Harvest and Post -harvest Technology (20 Hours)

- 3.1 Harvesting- precautions observed during harvesting, sorting, and grading the catch
- 3.2 Nutritive value of fish and biochemical composition of fish flesh
- 3.3 Fish spoilage and fish preservation
- 3.4 Fish preservation and processing- Icing and freezing, canning, salting, Drying, curing, smoking etc.
- 3.5 Fish products and by-products- Liver oil, meal, manure, glue, isinglass, Leather, chitosan, fish maws, fish protein concentrate, fish fins
- 3.6 Fish food poisoning

Module 4 Fish Export and Extension (5 Hours)

- 4.1 Transportation and marketing: Overseas market for diversified products and principal world market for diversified sea food products
- 4.2 Fisheries extension: extension philosophy and extension methodology
- 4.3 The status of Indian fishery co-operative movement and Fish farmers development agencies

AQUACULTURE

Module 5 Aquaculture (10 Hours)

- 5.1 Scope and objectives of aquaculture; status in India

- 5.2 Culture systems-
 - 5.2.1 Criteria for space and site selection
 - 5.2.2 Culture systems- Pond, Bheries, salt pans, tanks, race way, cage, pens etc.
- 5.3 Hatcheries- different types
- 5.4 Design and construction of aquafarms

Module 6 Breeding and seed production (10 Hours)

- 6.1 Bionomics of cultivable species of fish and shellfish (Mulletts, milk fish, pearl spot, carps, Penaeus spp., Macrobrachium spp.)
- 6.2 Breeding of fishes with special reference to Indian major carps – wet and dry bundh technique for breeding
- 6.3 Induced breeding
 - 6.3.1 Induced breeding in Fish – Principle , techniques and advantages of hypophysation, selective breeding and seed production
 - 6.3.2 Induced breeding in Shrimp- Techniques involved in shrimp breeding and seed production – eye stalk ablation etc.
- 6.4 Transport of live fishes- fingerlings and breeders
- 6.5 Cryopreservation of gametes and embryos
- 6.6 Common fish diseases – viral, fungal, bacterial and parasitic infections

Module 7 Nutrition in culture fishes (3 Hours)

- 7.1 Nutritional requirement of a culture fish
- 7.2 Feed- Live and formulated
- 7.3 Procedure of Feed formulation

Module 8 Methods of fresh water and brackish water fish culture (15 Hours)

- 8.1 Monoculture – Indian major carps (Catla, Rohu, Mrigal), exotic carps, Tilapia
- 8.2 Composite culture
- 8.3 Culture of air breathing fishes – ecology of swamps & use in culturing air breathing fishes
- 8.4 Shrimp culture: traditional and scientific brackish water culture practices in India with special reference to Kerala
- 8.5 Ornamental fish culture- exotic and indigenous species
- 8.6 Aquarium set up and maintenance; Aquarium plants and aquarium accessories
- 8.7 Frog culture

Module 9 Mariculture in India (7 Hours)

- 9.1 Sea farming and sea ranching
- 9.2 Prawn culture
- 9.3 Pearl culture and culture of edible molluscs
- 9.4 Turtle farming
- 9.5 Sea weed cultivation

Module 10 Integrated fish culture (5 Hours)

- 10.1 Paddy cum fish culture
- 10.2 Fish-livestock farming- manurial value of livestock wastes and their role in recycling for raising fish production
- 10.3 Sewage fed fish culture

 23. <http://mail.nbfgr.res.in/fbis>

Field work

1. Visit to freshwater and brackish water fish farms
2. Collection of water and soil samples from fish ponds for analysis of the hydrographical parameters

Study tour

Visit to fisheries institutes and fishing harbours to study the following:

1. Freshwater and brackish water aqua culture
- 2 .Fishing operations

3. Fish preservation and processing
4. **Boat** building and net making
5. Fisheries research, survey, education and extension

SPECIAL SUBJECT: FISH BIOLOGY AND FISHERY SCIENCE

Practical I

APZO4P.VIII ICHTHYOLOGY

Taxonomy

1. Identification and classification of 10 local fishes (Marine/freshwater) up to species level
2. Identification and classification of 5 prawns up to species level
3. Dissections and mounting
 - a) Membranous labyrinth
 - b) Ampullae of Lorezini
 - c) Brain
 - d) Scales-Placoid, cycloid, ctenoid.
 - e) Digestive system of a fish (cartilaginous or bony fish)
 - f) Urinogenital system of a teleostean fish
 - g) Pituitary gland

Fish Physiology

1. Effect of NaCl/KCl on fish chromatophores
2. Determination of the rate of oxygen consumption of a fish at room temperature
3. Determination of gonadosomatic index
4. Measurement of fecundity rate in a fish
5. Qualitative and quantitative analysis of gut content in a herbivorous and carnivorous fish
Determination of gastro-somatic index
6. Smear preparation of fish blood to study the morphology of different cellular elements
7. Differential count of fish WBC

Fish genetics

1. Sex determination in fishes
2. Hybridization techniques in fishes
3. Karyotyping in fishes

SPECIAL SUBJECT: FISH BIOLOGY AND FISHERY SCIENCE

Practical II

APZO4P.IX – Fisheries and aquaculture

Fish pond ecology

1. Determination of nutrients in the water samples from freshwater and brackish water ponds (Phosphat/sulphate/nitrate)
2. Determination of free calcium carbonate in the soil sample from freshwater and brackish water ponds
3. Determination of LC₅₀ for fish exposed to a given pollutant

Fish Pathology

4. Identification of common external fish parasites (At least 5 numbers)
5. Estimation of spoilage in fish by pH method
6. Determination of bacterial plate count for fish skin, flesh and gut

Breeding Techniques

7. Mounting of pituitary gland
8. Preparation of pituitary gland extract
9. Demonstration of hypophysation technique
10. Demonstration of artificial insemination
11. Demonstration of sperm motility in a fish
12. Preparation of a formulated fish feed

Fish byproducts

13. Identification and study of fish byproducts
14. Preparation of any one fish by product
15. Estimation of muscle protein
16. Estimation of muscle glycogen

Fishing crafts and gear

17. Identification and study of different types of fishing crafts (Minimum 5 numbers)
18. Identification and study of different types of fishing gears (Minimum 5 numbers)
19. Setting up of an aquarium
20. Study of aquarium accessories
21. Study of common aquarium plants (Minimum 5 numbers)

Semester IV
Special Subject-Insect Science

APZO 421.D General Entomology Total 100 hrs

Unit 1 Introduction (5 hrs)

- 1.1 Origin and Evolution of insects.
- 1.2 Fossil Insects
- 1.3 Insect-plant interdependence (Co-evolution)

Unit 2 Anatomy (20 hrs)

- 2.1 Integument: Histology of the basic components, Chemical composition of cuticle, sclerotization, physical properties of the cuticle, coloration, permeability characteristics, moulting and external integumentary process.
- 2.2 Head-Segmentation-Structure and modifications
- 2.3 Thorax-Segmentation-Structure-and modifications.
- 2.4 Abdomen-Segmentation-structure-and Characteristics
- 2.5 Wings-Origin and evolution of wings, venation-structure.
- 2.6 Appendages-segmentation-structure-Adaptive radiation of legs.

Unit 3 Embryogenesis (20 hrs)

- 3.1 Formation of blastoderm and germ cells, formation of germ band & extra embryonic membranes
- 3.2 Differentiation of germs layers.
- 3.3 Segmentation, Appendage formation and blastokinesis, organogenesis, polyembryony, control of embryogenesis, Oviparity, Viviparity, Oviposition, eclosion, postembryonic morphogenesis.
- 3.4 Growth m, metamorphosis, endocrine mechanisms in metamorphosis.

Unit 4 Insect Classification (10 hrs)

- 4.1 Biology and habits of the different orders of insects-classification upto families.
- 4.2 Biology and habits of aquatic gall forming and leaf-minig insects.
- 4.3 Adaptations of parasitic and predatory insects
- 4.4 Seasonal Adaptations-Dormancy-Diapause

Unit 5 Insect Physiology (30 hrs)

- 5.1 Insect nutrition: Anatomy and histology of foregut mid and hind gut. Modification of gut (filter chamber)
Process of secretion of enzymes, Microbiota&digestion of wood, Keratin wax and silk.
- 5.2 Respiratory system: Trachea, Tracheoles, Air sacs, Spiracles.
Types of ventilatory process-Passive ventilation bulk flow and active ventilation.
Passive suction ventilation and elimination of CO₂ Ventilation in aquatic insects, end parasitic insects and during mounting.
- 5.3 Central nervous control of ventilation.
- 5.4 Circulatory system: The dorsal vessel & accessory pumping sir uses.

Cardiac regulation & Circulation-General characteristics and chemical composition of haemolymph, haemocytes, Origin, number and function. Other tissues associated with circulatory system.

5.5 Excretory system: Malpighian tubules-anatomy and histology, Orthopteran, Hemipteran, coleopteran and lepidopteran types. Salt and water balance, control of diuresis and gut mobility, nitrogenous excretion, insect urine.

5.6 Nervous system, glandular and muscular systems.

5.6.1 Structure and function of the nervous system, nervous integration.

5.6.2 Exocrine and endocrine glands and their functions

5.6.3 Skeletal muscle, visceral muscle, muscle, muscle development and maintenance

5.7 Sense organs: Morphology of sense organs; sensory mechanisms, light and sound production

5.7.1 Mechanoreception- The tactile sense, proprioceptive sense, sound perception.

5.7.2 Chemoreception-Sensory coding phago stimulants and phagodeterrents

5.7.3 Thermoreceptors-Hygroreceptors.

5.7.4 Photoreception-Compound eyes, dorsal ocelli etc.

5.7.5 Light production and sound production.

5.8 Reproduction and morphogenesis.

5.8.1 Reproductive system and Gametogenesis in male and female.

5.8.2 Fertilization, Sex determination, parthenogenesis

Unit 6 Insect Communication (10 hrs)

6.1 Acoustic, Visual, tactile and chemical methods.

6.2 Role of hormones in communication

6.3 Pheromones

6.4 Kairomones

6.5 Allomones

6.6 Insect immunity.

13. Biology of Insect midgut.M.J. Lehane
14. Recent Advances in Insect. Physiology and Toxicology. G.T. Gujar
15. General and Applied Entomology, K.K. Nayar et.al.

Unit 1 Introduction Insect Pests (5 hrs)

1.1 Kinds of Insect pests. Major pests, minor pests, sporadic pests, endemic pests, exotic pests, seasonal pests, occasional pests, regular pests, persistent pests.

Unit 2 Causes of Pest Outbreak (8 hrs)

2.1 Deforestation, Destruction of natural enemies pest resurgence.

2.2 Secondary pest outbreak Intensive and extensive cultivation, Introduction of new crops, new varieties, hybrid varieties, cultural practices, change in agricultural practices-introduction of new pests.

2.3 Forecasting pest outbreaks and surveillance, short term and long term forecasting- Forecasting based on observations- Climatic and empirical factors.

Unit 3 Biology of Pest Insects. (20 hrs)

3.1 Biology, nature of damage and control of major pests of major crops. Paddy, coconut, vegetables, Pulses, coffee, tea, sugarcane, banana, tapioca, cashew, pepper, cardamom and stored products.

3.2 Insect pests of domestic animals, biology and control.

3.3 Biology of major arthropod vectors of human diseases belonging to Diptera, Anoplura, Siphonoptera-control of vectors.

3.4 House hold Pest Insects-Biology and control.

Unit 4 Industrial Entomology (12 hrs)

4.1 Silkworm Technology-Sericulture

4.2 Honey bee-Apiculture

4.3 Lac-Insect-Lac culture.

4.4 Insects as human food and as scavengers.

Unit 5 Principles of Insect Control (15 hrs)

5.1 Basic principles of Insect control, prophylactic methods, curative or direct methods.

5.2 Biological control-Brief history, theory behind classical biological control, Agents of biological control-Parasites and parasitoids, predators pathogenic micro organisms (Bacteria, fungi and viruses)

5.3 The practice of biological control-phases-conservation, Importation and colonization-mass culture and release of natural enemies.

5.4 Economic dimensions of biological control merits and demerits.

5.5 Important biological control projects undertaken in India against insect pests and weeds.

5.6 Important concepts relevant to the search for exotic beneficial insects (amenability of pests, pests and natural enemy associations in native home, climate similarities)

Unit 6 Insect Toxicology (15 hrs)

6.1 Chemical control-Inorganic and organic pesticides, pesticides of plant origin, chemosterilants, insecticide residues, insecticide formulations, appliances, fumigation & fumigants.

6.2 Principles of behavioural control-Pheromonal considerations-Communication pheromone, sex pheromone-aggregation pheromones-orientation theories use of other chemicals-

repellents-plant allomones-Antifeedants, Integration of behaviours modification with other tactics.

Unit 7 Pest Management

(15 hrs)

- 7.1 Concepts of pest management, definition, characteristics of pest management, pest management strategies and techniques.
- 7.2 Integrated Pest Management (IPM)-definition; IPM in Agro ecosystems, preventive practice, Therapeutic practice, selection of tactics, Integration of tactics.
- 7.3 Ecological Management of the Crop environment-
 - 7.3.1 Reducing average favourability of ecosystem,
 - 7.3.2 Disrupting continuity of pest requisites
 - 7.3.3 Diverting Pest populations away from crop
 - 7.3.4 Reducing the impact of insect injury.
- 7.4 Ecological back lash and its management-resistance of populations to pest management-tactics, Pest population resurgences and replacement-enhanced microbial degradation, upsets in community balance.

Unit 8 Insecticide Resistance

(10 hrs)

- 8.1 Genetic, physiological and biochemical mechanisms.
- 8.2 Insecticide metabolism-microsomal & extramicrosomal
- 8.3 Dynamics of environmental pollution by insecticides; its impact in the biosphere.
- 8.4 Insecticide poisoning, biological magnification, health hazards, silent spring (Rachel Carson)

Semester IV

Special Subject: Insect Science

Practical I

APZO4P. X (Taxonomy, Anatomy Histology and Physiology)

Taxonomy

1. Identification and preparation of taxonomic key of 10 insects belonging to 10 families and 4 orders.
2. Collection, preservation and presentation and insects belonging to 30 families
3. Mounting, sketching and labeling of taxonomic features of the following.
 - a) Wings in insects of 5 orders
 - b) Antennae in insects of 5 orders
 - c) Mouthparts in insects- 4 types
 - d) Legs-4 types

Anatomy & Histology

1. Dissection

- 1.1 Alimentary canal and associated glands of 4 groups of Insects with different feeding habits.
- 1.2 Reproductive system of any two female insects
- 1.3 Nervous system in any two groups
- 1.4 Stomatogastric Nervous system (Oesophageal, sympathetic, single recurrent nerve and paired recurrent nervous)
- 1.5 Endocrine system
- 1.6 Identification of sensilla employing a suitable staining technique.

2. Histology

- 2.1 Preparation of paraffin sections of insect midgut epithelium and ovary using Haematoxylin-eosin staining technique to demonstrate histological details.
- 2.2 Whole mount staining preparation of insect brain to demonstrate neurosecretory cells by PAVB technique.

Physiology

1. Quantification of proteins in fat body/haemolymph
2. Quantification of glycogen in fat body.
3. Demonstration of malpighian tubule activity using dyes neutral red/indigo carmine.
4. Identification of at least two free aminoacids inhaemolymph by paper chromatography
5. Quantitative estimation of any two digestive enzymes (Protease/amylase/Invertase)

6. Haemolymph protein profile employing PAGE
7. Identification haemocytes using Giemsa/Wright's/BPS stain.

NOTE: Candidates shall submit a collection consisting of 40 families of insects from different orders (It shall include dry collection, wet collection and slides including life stages). The collection shall be submitted at the time of practical examination along with practical record.

Practical II

APZO4P. XI Ecology, Economic Entomology and Experimental Entomology

Ecology

1. Methods of collection and identification of soil insects (any ten numbers)
2. Field work: A field study shall be conducted to observe the insects in their natural habitat. A detailed field report shall be submitted by each student which includes observation of insects in area such as forests, grass land, aquatic insects, sandy areas etc., The field report duly certified shall be submitted at the time of practical exam along with practical record.
3. Estimation of LC 50 value and LD 50 value of any two brands of insecticides for some aquatic/terrestrial organisms.

Economic Entomology

1. Collection, Preservation, identification and presentation of following categories of pests.
 - 1.1 Agricultural pests of different crops 10 numbers.
 - 1.2 Stored-Product pests-3 numbers.
 - 1.3 Vectors and veterinary pests-4 numbers
 - 1.4 House-hold pests – 5 numbers
 - 1.5 Beneficial insects-6numbers.
2. Collected and identified insect specimens and pests of crops shall be submitted at the time of practical examination. Candidates shall submit a minimum of 15 wet collections.
3. Field study to collect/observe insect species of pollinators, parasitoids, predators, scavengers and weed killers.
4. Field study of various methods of pest management
 - Pesticide formulation
 - Pesticide application
 - Safety hazards & First aid.

Experimental Entomology

1. Rearing of any two insects in the laboratory
2. Identification of Larval instars using Dyar's rule
3. Sexing of insects-Larva pupa and adult.
4. Effect of starvation on metamorphosis.
5. Demonstration of the following techniques.
 - a. Neck ligation
 - b. Extripation
 - c. Canterization
 - d. Ovariectomy

NOTE: Candidates shall submit a minimum of 15 numbers of different categories of pests at the time of practical examination along with the practical record. A duly certified field report also shall be submitted at the time of practical examination.
